DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Taiwan, ROC on May 27, 2003. It is noted, however, that applicant has not filed a certified copy of the Taiwanese application as required by 35 U.S.C. 119(b).

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Iizuka (US Pat. No. 6208613 B1).

Iizuka shows a disc carrier 121S for an optical disc drive (“optical disk player”, see col. 1, line 9), the disc carrier comprising: a recession (see central portion of 121S in Fig. 1) integrally formed on the disc carrier; and an axial tube 123 projecting from a central portion of a bottom wall of the recession. Iizuka shows a support member 181 fixed in the recession, the support member including a peripheral support edge (see 183 in Fig. 1) along a periphery thereof, the support member being adapted to be in contact with and thus support plural clamping members 161 of a clamping device (including 120S). Iizuka shows that the support member

includes a central hole (see 182 in Fig. 1) through which the axial tube 123 of the disc carrier 121S extends.

Allowable Subject Matter

5. Claims 4-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yano et al (US Pat. No. 5555233) show a disk hold device (see especially Fig. 9).
